Hello Stewart:

Thanks for your call the other day. I'm sorry we cannot attend the meeting on the 19th. I understand that ATSDR will be in attendance and Robert Knowles updated me and John Lyons last week on their engagement to date on this issue. Per my discussion with you, EPA can certainly review the final documents that DTSC and others at the State have assembled with regard to this site. I envision that the scope of EPA's review would be similar to what we are doing on Exide. Our review at this juncture would be a threshold review of whether the assessments and findings to date are complete or are missing elements that could significantly alter their conclusion. We would work closely with ATSDR on our review.

Thank you and good luck with the meeting.

Enrique
